4. Margot Rose - new app for eye gaze
5. Robert Smith- an app for his communication device that has spoken word prediction.
6. Nickolas Wheeler- More accessible smart home. Hand held device to control climate, lights, television, etc.

Margo Rose

Hi, my name is Margo.

I've been here for long time, and now I do all the letters for the meetings.

Then two years ago, I tried eye gaze, but it didn't work out for me.

I got a communication device that I have at home, but I don't use it.

Maybe there is a new application for eye gaze. Because I'm not able to use my hands, I use my head set. It's hard, but I'm getting better at it.
