

No installation is needed, just

1. Copy the folder "objectKarel" to your hard disk.
2. Run "Karel.exe".

Notes:

- The *.dll and *.bp/ files placed in the "objectKarel" folder are necessary for running the software and must not be deleted.
- The *programs* must be saved in the predefined subfolder "projects" and the *world situations* in the subfolder "World_Files".
- The four *.bmp files placed in the subfolders "Lessons", "projects" and "World_Files" must not be deleted.
- objectKarel cannot execute programs that have been developed with other software.
