

## *EditPad: Customizing Tab Size and Replacing Tab with Spaces*

Open EditPad. Click on “Options|Preferences...” Click on “File Types” in the new *Preferences* window. In the left upper scroll pane, scroll and choose “Java source code”. In the lower right side of the window, set *Tab size* to 2, *Block indent* to 2, and check the checkbox for “Pressing Tab inserts spaces instead of tab characters”. Then click on the bottom *Apply* button.
