

# Feature Transition Charts for Visualization of Cross-Project Scope Evolution in Large-Scale Requirements Engineering for Product Lines

Krzysztof Wnuk<sup>1</sup>, Björn Regnell<sup>1</sup>, Lena Karlsson<sup>2</sup>

FTC can visualize scope changes across the projects by aligning a set of FSCs and depicting transfers using special markers and lines.

FTC can also visualize within project transitions, represented by orthogonal lines and transition symbols similarly to across-project transition visualization.

“The practitioners believe that FTC can give a comprehensive overview of scoping dynamics”
